DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

1. Acoustic sensor with raised area, claims 1-7, 43-46 and 61.
2. Acoustic sensor with planar substrate, claims 1, 8, 9, 56.
3. Acoustic sensor with piezoelectric actuator, claims 1, 10-12.
4. Acoustic sensor with electromagnetic actuator 1, 13, 14, 60.
5. Acoustic sensor with raised area and off-center transducer, claims 1, 15-18, 26-31, 34, 35, 47-55 and 57.
7. Acoustic sensor with increased mass area, claims 60, 62-64.
8. Acoustic sensor with off-center piezoelectric transducer, claims 17 and 19-23.
9. Acoustic sensor with off-center electromagnetic transducer, claims 17, 24 and 25.
10. Acoustic sensor with off-center piezoelectric transducer and raised portion, claims 32, 33.
11. Acoustic sensor with off-center transducer, claims 36, 37.
12. Acoustic sensor insensitive to water, claims 38-42.
13. Acoustic sensor with angled transducer, claims 58, 59.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is

Art Unit: 2834

finally held to be allowable. Currently, claim 1 is generic for numbers 1-5 above. Claim 17 is generic for numbers 8 and 9. Claims 1 and 17 are partially generic for the remaining claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
